# hyaluronic acid (HA)

has revolutionized the management of equine joint health through the years and Hyalun<sup>®</sup> has become the standard for orally administered hyaluronic acid products. From the makers of Hyalun<sup>®</sup>, comes Hyalun<sup>®</sup> PRO.

Hyalun<sup>®</sup> PRO is the most concentrated and the highest molecular weight HA product for horses in the market today. Hyalun<sup>®</sup> PRO was formulated for the horse that you push to the limit. In competition, in showing and in other strenuous exercise regimes, Hyalun<sup>®</sup> PRO is sure to give your horses' joints the support they need. Now all you need to concentrate on is: **winning**.

## Benefits of HA

- Supports joint and cartilage function
- Reduces joint friction
- Maintains joint mobility
- Lubricates the joint

Synovial Fluid  
(hyaluronic acid)

With the comfort of the user in mind, Hyalun PRO's new handle is designed to fit easily into your hand, thus making it easier to administer to multiple horses without any additional strain on your fingers.
